

32 HORAS**INTRODUCTION**

This course teaches IT Professionals how to manage their Azure subscriptions, create and scale virtual machines, implement storage solutions, configure virtual networking, back up and share data, connect Azure and on-premises sites, manage network traffic, implement Azure Active Directory, secure identities, and monitor your solution.

AUDIENCIA

This course is for Azure Administrators. Azure Administrators manage the cloud services that span storage, networking, and compute cloud capabilities, with a deep understanding of each service across the full IT lifecycle. They take end-user requests for new cloud applications and make recommendations on services to use for optimal performance and scale, as well as provision, size, monitor and adjust as appropriate. This role requires communicating and coordinating with vendors. Azure Administrators use the Azure Portal and as they become more proficient they use PowerShell and the Command Line Interface.

PREREQUISITES

- Understanding of on-premises virtualization technologies, including: VMs, virtual networking, and virtual hard disks.
- Understanding of network configuration, including TCP/IP, Domain Name System (DNS), virtual private networks (VPNs), firewalls, and encryption technologies.
- Understanding of Active Directory concepts, including domains, forests, domain controllers, replication, Kerberos protocol, and Lightweight Directory Access Protocol (LDAP).
- Understanding of resilience and disaster recovery, including backup and restore operations.

COURSE OUTLINE**Module 1: Azure Administration**

- Azure Portal and Cloud Shell
- Azure PowerShell and CLI
- Resource Manager
- ARM Templates

Module 2: Azure Virtual Machines

- Virtual Machine Planning
- Creating Virtual Machines
- Virtual Machine Availability
- Virtual Machine Extensions

Module 3: Azure Storage

- Storage Accounts
- Azure Blobs
- Azure Files
- Storage Security

Module 4: Virtual Networking

- Virtual Networks
- IP Addressing and Endpoints
- Azure DNS
- Network Security Groups

Module 5: Intersite Connectivity

- VNet Peering
- VNet-to-VNet Connections
- ExpressRoute Connections

Module 6: Monitoring

- Azure Monitor
- Azure Alerts
- Log Analytics
- Network Watcher

Module 7: Data Protection

- Data Replication
- File and Folder Backups
- Virtual Machine Backups

Module 8: Network Traffic Management

- Network Routing
- Azure Load Balancer
- Azure Traffic Manager

Module 9: Azure Active Directory

- Azure Active Directory
- Azure AD Connect
- Azure AD Join

Module 10: Securing Identities

- Multi-Factor Authentication
- Azure AD Identity Protection
- Self-Service Password Reset

Module 11: Governance and Compliance

- Subscriptions and Accounts
- Role-Based Access Control (RBAC)
- Users and Groups
- Azure Policy

Module 12: Data Services

- Content Delivery Network
- File Sync
- Import and Export Service
- Data Box
